

# Program and Curriculum

## For children 2 months to 3years

We offer carefully designed environments for our little ones. Our goal is to help children become independent, Self-confident and inquisitive learners. We're allowing them to learn at their own pace and in the ways that are best for them.

The creative curriculum is that young children learn as they play. It requires active thinking and experimenting to find out how things work and to learn firsthand about the world we live in. They explore the world around them by using all their senses; touching, tasting, smelling, looking, and listening. Our curriculum directed toward goals in all areas of development.

- **Social:** To help children feel comfortable, make friends, trust their new environment.
- **Emotional:** To help children experience pride and positive attitude.
- **Cognitive:** To help children become confident learners, helping them to solve problems, ask question, and use their own ideas and words to describe.
- **Physical:** To help children increase their large and small muscle skills.

## Infant

Age-appropriate activities promote cognitive and social development in a warm, nurturing environment

## Toddler

Our program offers a balance of nurturing, playtime and learning throughout the day. Learning environments that keep your two-year old's fingers busy and their mind engaged and happy. Children participate in a full range of activities such as free play, circle time, creative arts, crafts, music, outdoor play and much more
